The image contains two circuit diagrams. The top diagram shows the connection for the PS1 IRM-60-24 power supply. It has two input pins on the left: ACIN (pin 1) and NOTR (pin 2). The power supply module has four pins on its right side: pin 4 is labeled AC/L and -V; pin 3 is labeled AC/N and +V; pin 5 is labeled GND and REG; and pin 6 is labeled INP. The connections are: ACIN to pin 1, NOTR to pin 2, pin 4 to pin 5, and pin 6 to ground. The bottom diagram shows the connection for the PS3 RACM30-24SK-2 power supply. It has two input pins on the left: NOTR (pin 1) and ACIN (pin 2). The power supply module has four pins on its right side: pin 1 is labeled VAC_IN_(N) and +VOUT; pin 2 is labeled VAC_IN_(L) and -VOUT; pin 3 is labeled 5 and REG; and pin 4 is labeled GND and INP. The connections are: NOTR to pin 1, ACIN to pin 2, pin 3 to pin 4, and pin 4 to ground.

Diagram showing the wiring for the PS2 module. The module has pins labeled REG_INP, COM-, COM+, +VIN, -VIN, -VOUT, and +VOUT. The connections are as follows:

- REG_INP (pin 1) is connected to a 5V supply.
- COM- (pin 5) is connected to ground.
- COM+ (pin 7) is connected to a 5V supply.
- +VIN (pin 2) is connected to a 5V supply.
- VIN (pin 4) is connected to ground.
- VOUT (pin 6) is connected to ground.
- +VOUT (pin 8) is connected to a 5V supply.
